Visitor Arrivals	Positive	-	Positive	Positive	Positive	Positive	Positive	Positive

The signs of the correlation coefficient are presented for the recreational fishery, commercial fishery, and price of uku. (*) indicate statistically significant predictive indicators using the Granger Causality Test. Overall rankings identify influential indicators. The signs of the correlation coefficient are presented for the recreational fishery, commercial fishery, and price of uku. The correlation coefficient for uku and each indicator are represented by the red points. The distribution of correlation coefficients for crustaceans, Deep 7, ECS, PMUS are presented as boxplots.

Time trends for the trips in the uku fishery and average state GDP. The dashed line reflect the average of trips for Deep 7 combined.
